PADEL

As one of the Global leaders in the World of hockey, we have the experience in creating the highest quality performance products with a unique and fashion forward look. We know how to harness absolute top performance combined with stunningly cool designs, appealing to the new audience of Padel players.

Since 2017 Osaka World has been making its name as one of the upcoming, modern brands on the padel stage. Now, after three years of studying, reengineering and redesigning, we have taken our Padel collection to the next level.

Our range is so beautiful, you will doubt between playing with it or putting it on display.

Pro Tour LTD

The Pro Tour Limited padel bats are the result of years of research and development in the world of padel bats. The entire collection is built by craftsmen with over 30 years of experience in padel bat construction. Our brand new shape takes elements from the best bats around the world and incorporates lessons we have learned over 10 years of composite fieldhockey stick construction.

Article Number: 12569

Pro Tour LTD *Metallic Black*

Power Frame / Soft Touch

S.R.P. €320

The Pro Tour Limited bats are the only bats in our collection to feature aluminium coated 3K woven carbon. The aluminium coating offers extra protection from impact and further enhances the strength to weight ratio that make carbon the most premium choice for high-end sports equipment. We only produce a set amount of these bats every year, truly making them limited editions.

Product Information

The Power Frame – Soft bat is our take on the well known teardrop shape. We have redesigned the traditional shape featuring elements to give it more structural stability as well as longevity. The frame itself features a 3D geometric side profile, shaped to provide extra stiffness without adding weight. This is also the only bat in our collection with metallic reinforced carbon, which has an even higher weight to stiffness ratio than normal woven carbon.

The medium density, soft touch EVA foam provides an incredibly sensitive rebound. This is ideal for precise and strategic play. It also feels very balanced because of smart weight distribution. Don't worry about power since this bat will still give you plenty. The softer foam generates a larger sweet-spot which will allow you to place balls with supreme accuracy.

Specifications

- Article Number: 12569
- Redeveloped twin-tube carbon frame – A 100% Japanese carbon frame – reshaped for pristine stiffness providing power and accuracy.
- Medium Density EVA foam – A soft feel with great power output
- 100% metallic reinforced carbon face – Extremely high weight/stiffness ratio
- 3D surface – A textured surface offering extra spin in all game situations
- Geometric profile for extra stability and stiffness
- Weight between 355 and 375 grams

Pro Tour LTD *Metallic White*

Power Frame / Hard Touch

S.R.P. €320

The Pro Tour Limited bats are the only bats in our collection to feature aluminium coated 3K woven carbon. The aluminium coating offers extra protection from impact and further enhances the strength to weight ratio that make carbon the most premium choice for high-end sports equipment. We only produce a set amount of these bats every year, truly making them limited editions.

Product Information

The Power Frame – Hard bat is our take on the well known teardrop shape. We have redesigned the traditional shape featuring elements to give it more structural stability as well as longevity. The frame itself features a 3D geometric side profile, shaped to provide extra stiffness without adding weight. This is also the only bat in our collection with metallic reinforced carbon, which has an even higher weight to stiffness ratio than normal woven carbon.

The high density, hard touch EVA foam provides excellent power delivery, without sacrificing precision on all strokes. Its balance centerpoint is more towards the head of the bat. This higher density foam also brings along a bit of extra weight, which again helps in generating power behind your smashes and offensive plays.

Specifications

- Article Number: 12569
- Redeveloped twin-tube carbon frame – A 100% Japanese carbon frame – reshaped for pristine stiffness providing power and accuracy.
- High Density EVA foam – A harder touch with excellent power output
- 100% metallic reinforced carbon face – Extremely high weight/stiffness ratio
- 3D surface – A textured surface offering extra spin in all game situations
- Geometric profile for extra stability and stiffness
- Weight between 370 and 390 grams

The Pro Tour collection is the heart of every collection we have designed since the start of the brand and truly represents what Osaka stands for: Uncompromising performance with superior aesthetics. We have always wanted to give athletes products that give them the confidence and properties that allow them to bring up the best in themselves. The Pro Tour is the culmination of that desire.

Product Information

The Power Frame – Soft bat is our take on the well known teardrop shape. We have redesigned the traditional shape featuring elements to give it more structural stability as well as longevity. The frame itself features a 3D geometric side profile, shaped to provide extra stiffness without adding weight. These bats feature a traditional Japanese woven carbon face which we have used and developed for nearly a decade.

The medium density, soft touch EVA foam provides an incredibly sensitive rebound. This is ideal for precise and strategic play. It also feels very balanced because of smart weight distribution. Don't worry about power since this bat will still give you plenty. The softer foam generates a larger sweet-spot which will allow you to place balls with supreme accuracy.

Power Frame

S.R.P. €125

The Vision Range is a great looking choice for players starting out with padel that want to push their game to the next level. They do not only look great, but also offer a twin tube glass fibre frame which is an excellent benefit to have at this pricepoint. the large surface area will help you strike the ball with a great feeling.

Product Information

The Vision – Power Frame is the shape that has been used by our sponsored players for the past 3 years. This is the shape we have used as the base for the development of our new Power Frame shapes. It is a traditional teardrop shape with power bar offering a bit more stability and stiffness than traditional teardrop shapes.

The medium densit EVA foam provides excellent power delivery, while still offering enough easy playability for beginning to advanced players. Its balance centerpoint is slightly more towards the head of the bat because of the geometry and the chosen foam.

Specifications

- Article Number: 12572
- Redeveloped twin-tube frame – 100% glass fibre
- Low to Medium Density EVA foam – A soft feel with generous rebound
- 100% glass fibre face
- Large face area offering a big sweetspot
- Weight between 350 and 370 grams

Vision *Jade Green - Oxy Red*

- Weight between 350 and 370 grams

Deshi *Aqua Blue*

Tyro Frame

S.R.P. €80

All Deshi products are focused on the players that have picked up padel for the first time and have fallen in love with the sport. The Deshi Tyro frame will help you develop your game by offering easy playability with a huge sweet-spot. These rackets have an expanded foam frame, so the foam comes all the way to the sides of the bat, making it easier for you to strike the ball efficiently.

Product Information

The Vision Deshi - Tyro Frame padel racket is designed for the beginning players looking to add some quality to their always improving game. The racket is made with an expanded frame construction method which allows for the creation of more forgiving rackets.

Thanks to the round shape and construction method, the sweet spot on the Vision Deshi is incredibly large allowing easier play.

Specifications

- Article Number: 12573
- Expanded Foam Frame – 100% glass fibre
- Low Density EVA foam – Easy playability and generous rebound
- 100% glass fibre face
- Large face area offering a big sweetspot
- Weight between 350 and 370 grams

Deshi Kids *Aqua Blue - Oxy Red*

Tyro Frame

S.R.P. €60

The Deshi Kids offers the same properties as his bigger brother, the Deshi. An expanded foam frame for easy playability, but we have reduced the size and thickness of the bats to make the bats lighter for our future champions. Get your padel game going early!

Product Information

The Deshi Kids – is our smaller version of the Vision Deshi for the smallest ones among us. We have shaved off a bit of width and weight, to help kids start to play padel. We still offer the same building quality.

Thanks to the round shape and construction method, the sweet spot on the Deshi Kids is incredibly large allowing easier play.

Specifications

- Article Number: 12574
- Expanded Foam Frame – 100% glass fibre
- Low Density EVA foam – Easy playability and generous rebound
- 100% glass fibre face
- Large face area offering a big sweetspot
- Weight between 280 and 300 grams

Bags

The Sports Range consists of 2 main fabrics: extremely durable DURA-PRO® tarpaulin, and an 800D ballistic polyester weave. This means that while the Sport range is still very durable it is also more affordable. Featuring Osaka Styling and offering players a budget-friendly way into the Osaka family.

The Sports Range consists of 2 main fabrics: extremely durable DURA-PRO® tarpaulin, and an 800D ballistic polyester weave. This means that while the Sport range is still very durable it is also more affordable. Featuring Osaka Styling and offering players a budget-friendly way into the Osaka family.

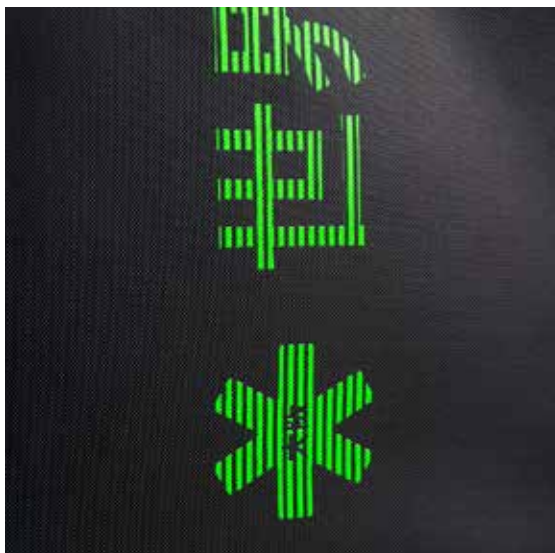

Product Information

The first Osaka padel backpack aims to do things a bit differently than its competition. Rather than offering bulky solutions for carrying multiple rackets we realised most players have only one bat, and love showing it around. The handy frontal bat compartment allows you to stow your bat and have it easily accessible come playing time.

The mixture of our signature Dura-pro tarpaulin and 800D polyester make this a very lightweight backpack that will last for years.

Specifications

- Article Number: 12668
- DURA-PRO® tarpaulin
- 800D ballistic polyester
- Handy bat compartment
- Water-resistant zipper
- Side-zipper for easy accessibility

Padel Sleeve *Iconic Black*

S.R.P. €15

The Sports Range consists of 2 main fabrics: extremely durable DURA-PRO® tarpaulin, and an 800D ballistic polyester weave. This means that while the Sport range is still very durable it is also more affordable. Featuring Osaka Styling and offering players a budget-friendly way into the Osaka family.

Product Information

This simple padel sleeve will protect your bat from the elements after your games.

It comfortably houses 1 bat and has protective cushioning around the entire surface of your bat. It also features a handy shoulder strap and small pocket accessible with a zipper for your keys or cell phone.

A very simple but handy companion at an excellent price-point.

Specifications

- Article Number: 12667
- 800D Polyester
- Valuables pocket
- Shoulder strap
- Osaka branding

Sports Backpack *Iconic Black*

S.R.P. €40

The Sports Range consists of 2 main fabrics: extremely durable DURA-PRO® tarpaulin, and an 800D ballistic polyester weave. This means that while the Sport range is still very durable it is also more affordable. Featuring Osaka Styling and offering players a budget-friendly way into the Osaka family.

Product Information

The Osaka Sports backpack is an excellent choice for a budget friendly, all-round sports backpack. It combines our signature DURA-PRO tarpaulin with 800D polyester to offer an ideal combination between durability and weight. It is also water-resistant of course and has a handy side pocket that will hold your keys or even a water bottle.

The basic shape makes it accessible to a wide range of athletes and even makes it a handy choice for every day use.

Specifications

- Article Number: 11883

The one element that we were missing to complete the range was sports footwear. The Osaka Footwear Collection is the start of a new era for sports footwear, it's all for the Athlete, the Athlete comes first.

Product Information

The mantra behind the Ido has always been: "The Athlete comes first." We wanted to fill the disconnect between what was perceived to be a performance sports shoe and what actually IS a performance sports shoe. Top minds from the athletic footwear industry have developed this shoe over the past 2 years to give you an edge over the competition and elevate your game to new heights.

Specifications
